

# Lifeline

## How Lifeline Works

### 1. Summon help

With a push of your Lifeline help button you can get help when you need it. With our advanced services, you have the option to include fall detection or locating technology in case you can't push your button.

### 2. Hear a reassuring voice

A caring Lifeline Response Associate will quickly access your profile and evaluate the situation.

### 3. Know help is on the way

Lifeline contacts a neighbour, loved one, or emergency services – based on your preferences – and will follow up to make sure help has arrived.
